A New Dynamic 2: Effective Systems in a Circular Economy claims traditional thinking is insufficient for predicting outcomes in a 'complex and evolving world'. It states that for profound transformation, we have to change our view of the world, and the authors seek to do just that with 11 chapters providing new perspectives on how to increase circularity.

If your row length is a compile time constant, C++11 allows. `auto arr2d = new int [nrows][CONSTANT];` See this answer. Compilers like gcc that allow variable-length arrays as an extension to C++ can use new as shown here to get fully runtime-variable array dimension functionality like C99 allows, but portable ISO C++ is limited to only the first dimension being variable.

How do I declare a 2d array in C++ using new? - Stack Overflow

In this article. C# 4 introduces a new type, dynamic. The type is a static type, but an object of type dynamic bypasses static type checking. In most cases, it functions like it has type object. At compile time, an element that is typed as dynamic is assumed to support any operation. Therefore, you do not have to be concerned about whether the object gets its value from a COM API, from a dynamic ...
