Ast 19 Probasco Rd East Windsor, NJ Shipping Agents - MapQuest

A high AST reading may indicate that there is a liver damage however; the damage may not necessarily be caused by hepatitis C. If a test shows that there is high amount of AST but the ALT enzyme is normal, this may indicate that the cause for the increased levels of AST may be emanating from other parts of the body.

AST SGOT - High, Normal, Low (Blood Test Interpretation)

Here's an easy way to find out your AST:ALT ratio: divide your AST level as shown on your blood test results by your ALT level. For example, if your AST is 20 U/L and your ALT is 18 U/L, then your ALT ratio would be 1.05, which is within the normal range.

The AST and ALT levels on your blood test results - what

AST

19. Alpha fetoprotein: levels > 1000 pg/ml are highly suggestive of primary liver cell carcinoma. 20. Hepatitis C viral testing identifies patients with chronic hepatitis C infection. 21. Elevated level of serum globulin (especially γ -globulins), positive ANA test may occur with autoimmune hepatitis.

AST/ALT Ratio - an overview | ScienceDirect Topics

Aspartate aminotransferase (AST) is an enzyme found in cells throughout the body but mostly in the heart and liver and, to a lesser extent, in the kidneys and muscles. In healthy individuals, levels of AST in the blood are low. When liver or muscle cells are injured, they release AST into the blood.
