Control theory is a relatively new field in engineering when compared with core topics, such as statics, dynamics, thermodynamics, etc. Early examples of control systems were developed actually before the science was fully understood. For example the fly-ball governor developed by James Watt to control overspeed of his steam engine was developed out of necessity, long before the science of controls came into being.

I passed on my first try without taking any classes. I did find some study guides and had a good library of subject matter at my job. Find the NCEES exam guide and read it, it will tell you what you need to study. I studied for 12 weeks, one or two days per week. Safety instrumented systems was the part I had to learn entirely from scratch.
