Fruits and Vegetables that you can Grow in the Hot Las ...

At first glance, the fruits (right) do not look like much but the hooked "spines" on the surface of a fruit are a big help in getting an animal to carry the fruit away in its fur. By accidentally carting off a fruit, a ground squirrel helps white ratany get its seeds far away, perhaps to a good place for a seed or two to become a young white ratany plant.

Fruits of Desert Plants | Ask A Biologist

A high desert is a desert region located at high altitude, as opposed to one at sea level or several hundred feet above sea level. Most deserts are defined as having very little rainfall, but a high desert can have rain and snow. Even though a high desert experiences extremes in temperatures, it is possible to grow vegetables in this climate.
