Electrical Estimator's Labour Unit Manual Fourteenth ...

Each company should select a database of labor units as its standard, be it published or company-created. I recommend the NECA Manual of Labor Units, as these are the benchmark of the electrical construction industry. They are periodically updated to keep current. Most published labor unit databases available today are directly affected by NECA's.

Electrical Contractor Magazine

An estimate is only as good as the information it is based on, and the NECA Manual of Labor Units (MLU) has been the estimating resource of choice for electrical contractors since 1923. The MLU provides an experience-based reference for estimating the electrical construction labor required to install typical electrical and communications systems.

NECA Manual of Labor Units (MLU), 2019-2020 Edition (4090-19)

Divide the manhours per unit into 8 to find the number of units one electrician can install in one 8-hour day: 8 divided by .250 equals 32 units per day. Multiply that amount by the number of crew members to find the number of units the crew is likely to install in an 8-hour day. For example, if the crew is two elec-
