In the 1660s, English physicist and mathematician Isaac Newton began a series of experiments with sunlight and prisms. He demonstrated that clear white light was composed of seven visible colors. By scientifically establishing our visible spectrum (the colors we see in a rainbow), Newton laid the path for others to experiment with color in a scientific manner.

True Colors is New York Times bestselling author Kristin Hannah's most provocative, compelling, and heart-wrenching story yet. With the luminous writing and unforgettable characters that are her trademarks, she tells the story of three sisters whose once-solid world is broken apart by jealousy, betrayal, and the kind of passion that rarely comes along.
